

CUSTOMER TESTIMONIAL: MASTERS GALLERY FOODS ACHIEVES SAFETY EXCELLENCE WITH EHS INSIGHT

CUSTOMER PROFILE

Industry: Food Manufacturing (Cheese Production)

Employees: 1000+

Operations: US-Wide Operations

Solution: EHS Insight Safety Management Platform

SUMMARY

Masters Gallery Foods, a leading national supplier of cheese products, implemented EHS Insight to modernize its safety management processes. With goals to improve incident reporting, increase compliance visibility, and eliminate manual tasks, the organization selected EHS Insight to support its evolving safety culture and operational excellence.

CHALLENGES

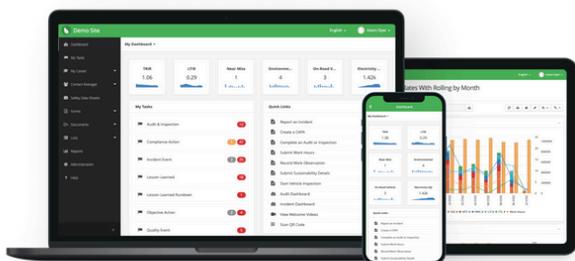

Before implementing EHS Insight, Masters Gallery Foods faced several safety management challenges:

- Manual and fragmented safety processes, burdening safety teams and slowing response times.
- Limited real-time visibility into incident reporting and compliance status across facilities.
- Engagement gaps with frontline employees on critical safety initiatives.

These challenges hindered proactive safety oversight and made it difficult to sustain continuous improvement efforts across departments.

RESULTS AT A GLANCE

- **Reduced manual safety tasks**, allowing more time for strategic planning.
- **Faster reporting** turnaround for quicker response to safety issues.
- **Broader employee participation** in safety reporting and engagement.
- **Real-time dashboards** gave leadership instant visibility into compliance.
- **Centralized tracking improved follow-through** on corrective actions and compliance tasks.

"Our safety processes are now more proactive, more efficient, and fully aligned with our company's commitment to keeping our people safe."

— **Safety Manager**
Masters Gallery Foods

SOLUTION

Masters Gallery Foods deployed EHS Insight's safety management platform to centralize and automate key safety processes:

Streamlined Incident Reporting

With EHS Insight, safety teams could eliminate paper forms and manual tracking, enabling quicker capture and resolution of incidents with digital workflows.

Automated Compliance Tracking

Automated reminders and built-in compliance dashboards ensured all mandatory safety checks, audits, and corrective actions were logged and visible in real time.

Intuitive User Experience

The platform's interface made it easier for employees at all levels to participate in safety reporting and engagement — fostering a culture where safety accountability is shared across the organization.

Real-Time Data and Reporting

With customizable dashboards and analytics, Masters Gallery Foods gained instant insight into safety performance trends and could make faster, data-informed decisions.

RESULTS & KPI'S

Masters Gallery Foods experienced measurable improvements following the EHS Insight implementation:

Operational Efficiency Gains

Eliminated manual safety tasks, freeing up time for strategic safety planning rather than administrative work. Faster reporting turnaround, improving responsiveness to safety issues as they occur.

Enhanced Safety Engagement

Employees across departments became more involved in safety reporting, contributing to a more proactive safety culture.

Improved Visibility for Leadership

Automated dashboards and real-time insights enabled leadership to monitor compliance status at a glance and make quicker corrective decisions.

Greater Accountability

Centralized tracking ensured corrective actions and compliance tasks were completed, reinforcing organizational accountability for safety.

CONCLUSION

Implementing EHS Insight helped Masters Gallery Foods transform its safety management from reactive and manual to proactive, data-driven, and employee-engaged. The company now enjoys streamlined safety operations, real-time visibility, and a strengthened culture of accountability and compliance — allowing it to focus on operational excellence and protecting its workforce.
