

# SAFETY & COMPLIANCE THAT SCALES WITH YOUR BUILDING MATERIALS BUSINESS

## CHALLENGES

- **Inconsistent safety processes** across plants, yards, and shifts
- **Limited visibility** into incidents, inspections, and training across locations
- **Difficulty standardizing audits** and corrective actions as operations expand
- **Increasing regulatory requirements** and audit demands
- **Manual reporting** slowing operational and safety decision-making

## THE EHS INSIGHT SOLUTION

### Incident Management

- Standardize incident reporting and investigations across all locations
- Capture employee and contractor incidents in a single system
- Identify trends across facilities and departments

### Audit & Inspection Management

- Deploy consistent inspections across sites, equipment, and operations
- Compare performance across plants and locations
- Track corrective actions and closure rates in real time

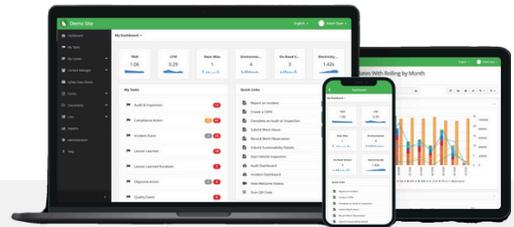

## BUSINESS IMPACT

- **Reduced recordable** and repeat incident rates
- **More consistent safety performance** across locations
- **Faster, more confident** regulatory and customer audits
- **Improved visibility for safety** and operations leaders
- **Lower operational risk** as the organization grows

## OVERVIEW

Mid-market building materials manufacturers and distributors manage operations across multiple plants, yards, and distribution centers while continuing to grow through new projects, facilities, and acquisitions. As organizations scale, inconsistent processes, manual reporting, and limited visibility can quickly increase risk and operational complexity.

EHS Insight provides a flexible safety and compliance platform designed to help growing building materials companies standardize workflows, centralize data, and gain real-time visibility — without the complexity of enterprise systems.

### Training Management

- Manage role-based training across employees and contractors
- Monitor certifications, expirations, and compliance automatically
- Connect training results to incidents and audit findings

### Compliance Tasks & Corrective Actions

- Centralize regulatory obligations, permits, and follow-ups
- Track compliance tasks across multiple locations
- Maintain clear audit trails for inspections and internal reviews

## WHY MID-MARKET TEAMS CHOOSE EHS INSIGHT

- Designed for growing, multi-site organizations
- Easy to configure without heavy IT involvement
- Real-time visibility and reporting across plants and yards
- Scales as operations expand and new locations are added
- Unified dashboards deliver cross-site benchmarking, trend analysis, and actionable insights to reduce risk and improve performance.
