

# STANDARDIZING SAFETY & COMPLIANCE FOR MID-MARKET FOOD & BEVERAGE PRODUCTION

## CHALLENGES

Food and beverage production teams commonly face:

- **Delayed or incomplete incident and near-miss reporting** from the production floor
- **Inconsistent safety and sanitation audits** across plants and shifts
- **Difficulty tracking corrective actions** and regulatory deadlines
- **Limited visibility** into compliance status across facilities
- **Managing hundreds of SDSs** for sanitation, CIP systems, and maintenance chemicals
- Increasing FDA, USDA, FSMA, and customer audit pressure

## THE EHS INSIGHT SOLUTION

### Incident & Near-Miss Management

- Capture incidents, near misses, and first aids directly from the plant floor — online or offline
- Standardize investigations with root cause analysis and corrective actions
- Track injury trends across shifts, lines, and facilities in real time

### Audit & Inspection Management

- Run consistent safety, sanitation, GMP, and equipment audits with digital checklists
- Capture photos, findings, and corrective actions directly from the floor
- Identify recurring hazards and non-conformances with automated scoring and trends

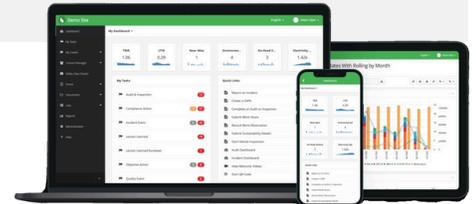

## RESULTS

- **Reduced recordable and repeat incident rates**
- **More consistent safety** and sanitation performance across plants
- **Faster, more confident** FDA, USDA, and customer audits
- **Improved corrective action** closure rates
- **Reduced administrative time** managing spreadsheets and paper records
- **Greater visibility** and control as operations scale

## OVERVIEW

Mid-market food and beverage producers operate in fast-paced, highly regulated environments where safety, sanitation, and compliance must keep pace with production demands. As organizations grow across multiple plants, shifts, and product lines, inconsistent processes and manual tracking increase the risk of injuries, audit findings, and regulatory exposure.

EHS Insight provides a flexible safety and compliance platform designed to help growing food and beverage companies standardize core EHS workflows, centralize data, and maintain audit readiness — without enterprise-level complexity.

### Compliance Tasks & Corrective Actions

- Centralize regulatory obligations, corrective actions, and audit follow-ups in one system
- Automate assignments, deadlines, reminders, and escalations
- Maintain clear audit trails for internal, customer, and regulatory inspections

### SDS & Chemical Management

- Centralize SDSs for sanitation, maintenance, and production chemicals
- Provide instant access to SDSs on the plant floor and in maintenance areas
- Track chemical hazards, updates, and availability across facilities

## WHY DO MIDSIZE FOOD & BEVERAGE TEAMS CHOOSE EHS INSIGHT?

- Designed for growing, multi-plant operations
- Easy to implement without heavy IT involvement
- Mobile-ready for production floors and sanitation teams
- Highly configurable for food safety and operational workflows
- Scales as facilities, shifts, and product lines expand
